

Change Arrows on Next, Back and Submit Buttons to Text

The one-at-a-time interaction for desktop and all mobile-optimized interactions will change the text of the Next, Back, and Submit buttons to arrows by default. If you're not a fan of how this looks you can use a little [JavaScript](#) and CSS to change these back to text.

The screenshot shows a mobile interface for "Course Registration". At the top is a teal header with the title "Course Registration". Below the header is a question: "What courses would you like to take this quarter?". There are five radio button options, each in its own rounded rectangular box: "Calculus", "Statistics", "Robotics", "Engineering", and "Computer Programming". At the bottom of the screen is a dark navigation bar containing a left-pointing arrow, a progress indicator showing "33%", and a right-pointing arrow.

Add Javascript to Custom Head

Copy and paste the below JavaScript into your survey's theme. To do so, go to the **Style** tab and scroll to the bottom of the survey preview to access the link to the **HTML/CSS Editor**. JavaScript code should be placed on the **Custom Head** tab.

Change the Navigation Buttons on Mobile Only

```
<script>
$(document).ready(function(){
  $('.sg-mobile-optimized .sg-submit-button').val('Submit');
  $('.sg-mobile-optimized .sg-next-button').val('Next');
  $('.sg-mobile-optimized .sg-back-button').val('Back');
});
</script>
```

Change All Navigation Buttons (Mobile and Desktop)

```
<script>
$(document).ready(function(){
  $('.sg-back-button').val('Back');
  $('.sg-submit-button').val('Submit');
  $('.sg-next-button').val('Next');
});
</script>
```

Add CSS to Your Survey Theme

Copy and paste the below CSS in your survey's theme. To do so go to the **Style** tab and scroll to the bottom of the survey preview to access the link to the **HTML/CSS Editor**. CSS code should be placed on the **Custom CSS** tab.

```
.sg-survey body.sg-mobile-optimized .sg-button-bar .sg-next-button, .sg-survey body.sg-mobile-optimized .sg-button-bar .sg-submit-button, .sg-survey body.sg-int-virtual-page .sg-button-bar .sg-next-button, .sg-survey body.sg-int-virtual-page .sg-button-bar .sg-submit-button {
width: 77px;
}

.sg-survey body.sg-mobile-optimized .sg-button-bar .sg-back-button, .sg-survey body.sg-int-virtual-page .sg-button-bar .sg-back-button {
width: 77px;
}
```

Scripting and Other Custom Solutions

We're always happy to help you debug any documented script that is used as is. That said, we do not have the resources to write scripts on demand or to debug a customized script.

If you have customization ideas that you haven't figured out how to tackle, we're happy to be a sounding board for Alchemer features and functionality ideas that might meet your needs. Beyond this, check out our [Professional Services](#); these folks have the scripting chops to help you to achieve what you are looking for!
