

Share, Email, Embed, or Schedule a Report

Leading Practices and FAQs

Want to see how to take projects from good to great? Check out our [Leading Practice & FAQ Home Page!](#)

Our report sharing features allow you to share results with your customers, clients, colleagues, and stakeholders as soon as responses start rolling in!

You can easily schedule a report to send now or later on a one-time basis, or set it up for recurring daily, weekly, monthly or yearly deliveries to up to five email addresses. This means no more scrambling on the first day of the month for last month's data, it will be packaged up and delivered automatically!

Check out our [Share, Email, and Schedule an Export Tutorial](#) to learn about Export sharing options.

Share Your Standard Report

After [creating](#), [customizing](#), and [styling](#) your Standard Report click the **Share Report** option in the upper right of your report to get started with sharing.

First, you will see a **Shareable Link** available for sharing your Standard Report. You also have the option to **Customize this link** where you can choose between a default, branded subdomain or [private domain](#) link. Learn how to make sure that all report links use your [private domain by default](#) (requires Account Administrator privileges).

Want a preview of what viewers will see when you send out this link? Click **View** to get a preview of the report itself.

 Embed on your website  Customize this link

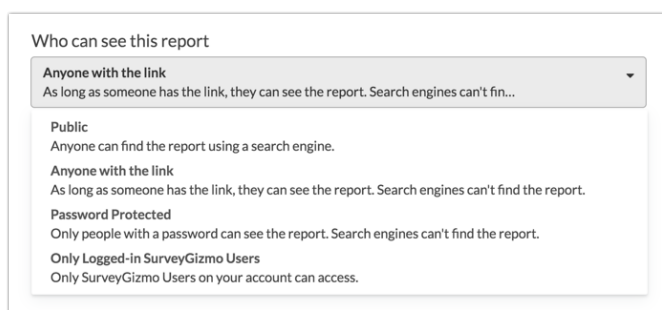

Embed a Report

Below the Shareable Link you will see a link to **Embed on your website**. If you click this link you'll be provided with an **iFrame Embed Code** you can use to embed the report right on your website! To do so copy the **Embed Code** and paste it in the source code of your website.

Customize Privacy Settings in the Standard Report

Before you share your Standard Report you will probably want to consider the privacy settings for the report. Under **Who can see this report** you'll have the following 4 options:

Public

If you choose to make the report Public, the report will be indexed by search engines and anyone on the internet may be able to find it (with the right search terms of course).

All Personally Identifiable Information (PII), e.g. Names, Email Addresses, etc., will be automatically excluded from publicly shared reports. This includes the **Public** and **Anyone with the link** share options.

Anyone with the link

Viewers must have the link to get to the report. Search engines will not be able to index the report or serve it up in search results.

All Personally Identifiable Information (PII), e.g. Names, Email Addresses, etc., will be automatically excluded from publicly shared reports. This includes the **Public** and **Anyone with the link** share options.

Password Protected

Viewers must have the link as well as a password to view the report. When you select this option you'll specify the password in the field provided below.

The screenshot shows a form titled "Who can see this report". A dropdown menu is set to "Password Protected" with a subtext: "Only people with a password can see the report. Search engines can't find the re...". Below this is a "Password" field containing the text "Pa55wOrd".

Only Logged-in Alchemer Users

This option will take viewers to the Alchemer login page in order to see the report. This option is not compatible with private domains.

Account Administrators can require all shared reports to be password protected or only accessible by Logged-in Alchemer users under Account Settings.

Standard Report Share Options

Below the privacy options you will see several other sharing options.

The screenshot shows the "Share Report" interface. At the top, there is a "Shareable Link" field with "Copy" and "View" buttons. Below it are links for "Embed on your website" and "Customize this link". The "Who can see this report" dropdown is set to "Anyone with the link" with subtext: "As long as someone has the link, they can see the report. Search engines can't...". A green box highlights the "Options" section, which includes:

- Show Social Sharing Buttons
- Allow Date Filtering
- Allow Answer Option Filtering
- Hide System Data
- Hide Geo Tracking Data
- Hide First Party Data
- Allow Exports — not compatible with date filtering
- Email Report Automatically

The "Report Expiration" is set to "06/21/2022". At the bottom, there is an "IP Whitelist" field with the text: "IPv4 supported, please use CIDR block for ranges, comma delimited."

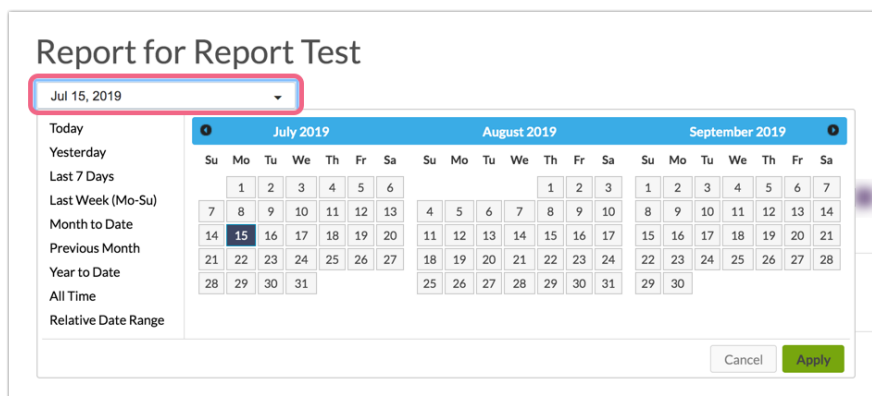

Show Social Sharing Buttons

This option will include buttons to allow viewers to share your report on the following social media sites: Facebook, Twitter, Google+, and LinkedIn.

Allow Date Filtering

This option will provide the date filter menu to your viewers, allowing them to view data that was collected in defined time frames.

Allow Answer Option Filtering

This option will provide a filter menu to your viewers, in which they can select to filter results by answer option. This filter will populate a logic bar displaying the available conditions of Previous Questions, System Data, Geo Tracking Data, and First Party Data.

All Personally Identifiable Information is automatically excluded from publicly shared reports. Report builders sharing Password Protected and Logged-in User links have the ability to hide System, Geo Tracking, and First Party data from the filter options.

Once the filter is applied, the report view will update to display responses according to the filter rules. Removing the filter will return the report back to its original view.

If sharing an already filtered report, report viewers will be able to further filter the report, or delete the filter entirely, giving them access to the entire results.

The Allow Answer Option Filter option is not compatible with the Allow Exports option.

Allow Exports

This option will provide viewers with a button to download the report

Click the download tab and select the download format from the dropdown (PDF, PowerPoint, Excel, or Word) and click **Start Download**. For PDF downloads, you'll be able to insert a page break after each question. (added screenshot)

Download

Select your Download Format

PDF

Insert a page break after each question

Cancel Start Download

You will notice that this option is not compatible with filtering options. If you try to select the two together the filtering option will be unchecked.

Options

- Show Social Sharing Buttons

IP Whitelist

IPv4 supported, please use CIDR block for ranges, comma delimited.

To create an IP allowlist, report builders input single, multiple or a range of IP addresses into the IP allowlist text field, using IPv4 format. Multiple addresses and IP ranges should be comma delimited, using CIDR block.

Report viewers who try to access the report while not on a allowlisted IP Address will receive an error message, preventing them from accessing the report.

Report Expiration Date

An expiration date can be added to Share Report links to prevent viewers from seeing data beyond a defined time. Access to reports with expiration dates will expire at midnight (according to the time zone set on your account) of the expiration date entered.

Report Expiration
05/25/2022

Expiration dates must be set to a future date, dates in the past cannot be selected. Reports that are scheduled or set for one-time delivery cannot be set to run on or after the selected expiration date.

You can check the status of the share link in your saved reports list. Note that even if the survey is closed, report links can remain active. (Added screenshot)

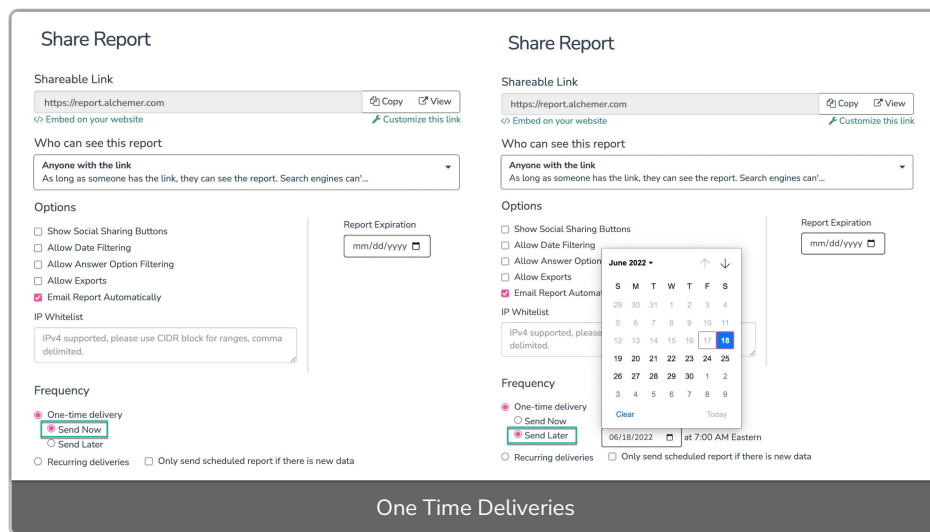

Email and Schedule Options for Your Standard Report

Once you check the option to **Email Report Automatically** you will have a number of tools available to set up a one-time delivery or recurring deliveries of your report.

One-time Delivery

1. Get started with sharing your report by choosing to **Send Now** or **Send Later**. Select the **Send Now** option to deliver the report as soon as possible according to the queue. If you want to schedule the report to **Send Later**, enter a future date for the report to send. All reports that are scheduled to send at a later date will be sent according to the queue at 7 a.m. Eastern Time on the specified date.

Note: If a report share link has an expiration date set, the date and time of the email must occur before the expiration date.

2. In the **Send To** field enter up to 5 email addresses. These will be the recipients of your report. Please remember to use commas (no spaces) between each email address.

3. Customize the **From Name**, **Subject**, and **Message** fields. While these are not required, we recommend personalizing these fields to help the report recipients identify who the email is coming from and what the report is about.

Recurring Deliveries

The **Recurring delivery** option allows you to select your desired email delivery schedule so that

you can receive your scheduled reports run at specified increments.

When do these scheduled email options actually send?

When you select and save one of the recurring send options your report/exports will be queued with all other scheduled reports/exports. Below are the details for when each queue *begins* sending. It is important to note that the size of the queue will affect when your email is actually sent.

- **Daily** - This queue of reports/exports begins sending at 7:00 am ET.
- **Weekly** - The queues for all weekly scheduled reports/exports begin sending at 7:30 am ET.
- **Monthly** - The queues for all monthly options begin sending at 7:30am ET.

Get started by selecting the recurring delivering schedule you wish to use.

The screenshot shows a configuration form for 'Recurring Deliveries'. Under the 'Frequency' section, the 'Recurring deliveries' radio button is selected and highlighted with a green box. Below it, the 'Daily' radio button is also selected. To the right, there are fields for 'Start Date' (06/23/2022) and 'End Date' (06/30/2022), both with calendar icons. There is also an unchecked checkbox for 'Include weekends' and another unchecked checkbox for 'Only send scheduled report if there is new data'. The 'Send To' field is empty. At the bottom, a dark grey bar contains the text 'Recurring Deliveries'.

Daily

You can schedule your report to send every day for up to a two-year period. Enter the date range you wish to schedule your report, with a start date as early as tomorrow, and an end date no more than two years from the start date. By default, weekends will be excluded, but can easily be included by checking the Include Weekends box.

The screenshot shows a configuration form for 'Daily Deliveries'. Under the 'Frequency' section, the 'Recurring deliveries' radio button is selected. Below it, the 'Daily' radio button is selected and highlighted with a green box. To the right, there are fields for 'Start Date' (06/23/2022) and 'End Date' (06/30/2022), both with calendar icons. There is also an unchecked checkbox for 'Include weekends' and another unchecked checkbox for 'Only send scheduled report if there is new data'. The 'Send To' field is empty. At the bottom, a dark grey bar contains the text 'Daily Deliveries'.

Weekly

You can schedule reports to send weekly based on the days you select. You have the flexibility to select single or multiple days to send the reports each week. You will define a weekly cadence, for example every two weeks, with a maximum of sending every 48 weeks.

From Name

Monthly Deliveries

The options available will change depending on the date selected for the Start Date. For example, if you select July 22 as the start date (the fourth Friday of the month), the options to send monthly will include every month on the 22nd, the fourth Friday of every month, the first day of the month, and the last day of the month. You will need to adjust the start date to change the options (e.g. select July 15 as the start date if you wish to send your report on the third Friday of every month).

You can decide the monthly cadence as well. For example, you can schedule reports to send every three months on the specified day, rather than every month.

Yearly

You can schedule reports to send annually. When entering the date range, the first report will be sent on the start date, and subsequent reports will be sent annually by the end date, with a two-year maximum.

Unschedule a Report

To stop a scheduled report from sending simply go to **Share Report** in the upper right of your Standard Report and uncheck the option to **Email Report Automatically**. Click **Save** and you're all set!

Share a Hard Copy of Your Standard Report

You can download your Standard Report to PDF, Excel, Word, or PowerPoint by clicking the **Download** button in the upper-right corner when viewing the report within the Alchemer application.

Share All Other Reports

To share reports that are not the Standard Report, i.e. Fall-Off Statistics, TURF, Profile, Cross Tab, Comparison, etc.), click on **Customize Report** and navigate to the **Share** tab.

- You will immediately have a **Distribution link** available for sharing. You can copy this distribution link and email it to project stakeholders or link to it on your website. This link will display the report itself as you see it in the application. When stakeholders visit this report, they'll also have the option to download it as a PDF, Word document or CSV file. You also have the option to **Customize this link** where you can choose between a default, branded subdomain or **private domain** link. Note: At this time UK private domains will not work with Report share links.
- The **JavaScript Embed Code** will allow you to embed the report right on your website! Copy the JavaScript embed code and paste it on your website.
- You also have the option to **Password protect access to this report** for added security.

Schedule your Report

Once you determine who you want to email your report to, the next step is to specify the

frequency with which the report will be emailed.

- The **One-time delivery** option lets you specify a date and time (in EST) for the report to be sent out. *To ensure that this sends it is best to set this to at least one hour out.*
- The **Recurring delivery** option allows you to select your desired email delivery schedule so that you can receive your scheduled reports run at specified increments. These recurring deliveries can be set to re-run 30, 60, 90 or 120 times before needing to be rescheduled. You will be notified via email 15 days before your last run that you need to reschedule the recurring deliveries.

Note: If a report share link has an expiration date set, the date and time of the email must occur before the expiration date.

- **No Schedule** is selected by default. If you decide that you no longer want to schedule your report you can select this option.

The link for reports in the scheduled email will display the report itself as you see it in the application.

Only Send a Scheduled Report if There is New Data

You may find that you only want a report to be emailed if there is new data to report on. No worries! You can make sure this happens by checking the following setting.

The screenshot shows a scheduling interface with the following elements:

- A status bar at the top: "Next Run: Not Scheduled"
- Three radio button options:
 - No Schedule
 - One-time delivery (EST)
 - Recurring delivery
- Time selection fields for the one-time option: "Month", "Day", "Year", "at:", "1", "00", "AM".
- Recurring delivery settings:
 - Frequency: "First of the month" (dropdown)
 - Re-run: "60 times" (dropdown)
- A checkbox at the bottom: Only send scheduled report if there is new data (highlighted with a red box)

Remove a schedule

Scheduled reports will continue to run based on the number of times you've selected. To remove a schedule from a report and halt further sends, find the survey and report in question, click **Customize Report** and go to the **Share** tab. Scroll to the Scheduled Delivery section, select **No Schedule** and **Save**.

Share a Hard Copy of your Report

You can print a report by clicking the printer icon next to **Customize Report**.

If you prefer, the Legacy Summary Report, [Profile Report](#), [Comparison Report](#), [TURF](#), and [Crosstab Report](#) have the option to export a hard copy to PDF, Word, Excel or PowerPoint. These files can then be shared with your project stakeholders.
