

Multiple Accounts With Same Email Address

If you have accounts hosted across Alchemer's various [data centers](#) (US, EU, CA), chances are that you use the same email address to log in to those accounts. If you don't use the same email address across accounts, when you log in you will access the associated account directly.

Which account would you like to use?

If you are using the same email address on multiple accounts, you will be taken to the **Which account would you like to use** portal where you will be asked which account (identified by data center) you wish to log in to.

The screenshot shows a web interface titled "Which account would you like to use?" with the subtitle "You have multiple accounts with the same email address." There are three data center options listed, each with a red box around its title:

- United States Data Center**: Shows "Company Account" as the logged-in account. It includes fields for "Account ID: xxxxxx", "Last Login: Thursday, April 25th 2019", and "Account Created: Wednesday, October 31st 2012". There is an "Edit Account Nickname" field and a blue "Continue" button.
- European Data Center**: Shows "Company Account - EU". It includes fields for "Account ID: xxxxxx", "Last Login: Tuesday, February 10th 2015", and "Account Created: Tuesday, February 10th 2015". There is a blue "Use This Account" button.
- Canadian Data Center**: Shows "Company Account - CA". It includes fields for "Account ID: xxxxxx", "Last Login: Wednesday, June 24th 2015", and "Account Created: Wednesday, June 24th 2015". There is a blue "Use This Account" button.

You will initially be logged in to one account. Click the **Continue** button to proceed with this account. If you have set up [Multi-Factor Authentication](#) on this account, you will be asked to authenticate in the next step. Otherwise, you will be taken directly to the account.

- You also have the option of updating the *Account Nickname* at this point. This will help you identify this account when you land on this page in the future.
- If you want to change the nickname, click the **Edit Account Nickname** button and customize the nickname in the provided field.

This is a close-up of the "United States Data Center" section from the previous screenshot. A red box highlights the "Company Account" field, which is followed by the text "Logged In". To the right of this field is the "Edit Account Nickname" field. A red arrow points from the "Edit Account Nickname" field back to the "Company Account" field. Below these fields are the account details: "Account ID: xxxxxx", "Last Login: Thursday, April 25th 2019", and "Account Created: Wednesday, October 31st 2012". A blue "Continue" button is located at the bottom right of this section.

If you prefer to log in via one of the other available accounts in the list, click the **Use This Account** button associated with that account. Input the corresponding password and click the **Access Account** button to proceed.

The screenshot shows a login interface with the following elements:

- Title:** Which account would you like to use? (You have multiple accounts with the same email address.)
- Section 1 (United States Data Center):**
 - Account:** Company Account — Logged In
 - Account ID:** xxxxxx
 - Last Login:** Thursday, April 25th 2019
 - Account Created:** Wednesday, October 31st 2012
 - Buttons:** Edit Account Nickname, Continue
- Section 2 (European Data Center):** (Highlighted with a red box)
 - Account:** Company Account - EU
 - Account ID:** xxxxxx
 - Last Login:** Tuesday, February 10th 2015
 - Account Created:** Tuesday, February 10th 2015
 - Buttons:** Use This Account
 - Form:** Password field (masked with dots) and Access Account button

If you have set up [Multi-Factor Authentication](#) on this account, you will be asked to authenticate in the next step. Otherwise, you will be taken directly to the account.

Password Reset

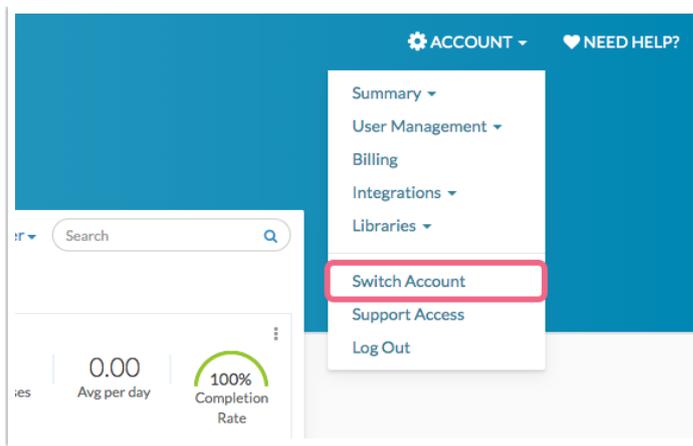

If you have multiple accounts with the same email address and [request a password reset](#), you will receive one email for each data center where you have these accounts. For example, if you have accounts in the US and EU data centers that both use the email jane.smith@company.net, you will receive two password reset emails (one for US and one for EU).

Each email will have a separate reset password link for each account with that email address in a given data center. Click on the password reset link associated with the specific account which you wish to update.

Switch Account

If you are logged into one of your accounts and want to switch to a different account that shares the same email address, you can do so via the Account menu.

1. Click **Account > Switch Account**.

2. You will land on the **Which account would you like to use?** portal.

- Click the **Use This Account** button associated with the account that you want to access.
- Input the password associated with that account and click the **Access Account** button.
