

Having trouble logging in?

Are you having trouble logging in? There are a couple of scenarios that might cause log in trouble.

You forgot your password

If you have forgotten your Alchemer login password, you can reset your password via the login screen at:

<https://app.alchemer.com/login/v1>

1. Click the **Forgot your password?** link found just above the **Log In** button.

The screenshot shows a login form titled "Welcome Back!". It has an "Email" field with the placeholder "username@example.com" and a "Need an account?" link. Below it is a "Password" field with a "Forgot your password?" link highlighted in a red box. At the bottom is a "Log In" button.

2. Enter the email address associated with your Alchemer user account. If you need to go back to the login screen, click **Never Mind**. Otherwise, click **Reset Password** to proceed.

The screenshot shows a screen titled "Need help with your password?". It asks the user to "Enter the email address you signed up with" and has a text input field containing "jon.smith@company.net". Below the input field are two buttons: "Never Mind" and "Reset Password".

3. For security purposes, you will need to complete a **reCAPTCHA** form to proceed. Follow the on-screen prompts and click **Verify** to finish. Once complete, an email with reset instructions will be sent.

4. Click on the password reset link within the email to create a new password. *The link is valid until Midnight (EST)*. Once you click it, you will be taken to a page where you can set up a new password.

You can attempt to reset your password a *maximum of three times*, at which point you will be locked out of the system for *20 minutes* before you can attempt again.

You're a new user added to an existing account

When you are added as a user on an existing account you will receive an invite email with a link to login.

- If you click this link straightaway, you will be taken to a reset password screen where you will set up your permanent password; after which, you will be logged in.
- If, however, you wait more than 24 hours to click the link, it will have expired. You will see a message that states **Your link is either incorrect or expired. Please try again**.
 - To proceed, enter your email address and click **Reset Password**. Check your email and click the link to reset your password and log in!

Whoops! Your link is either incorrect or expired. Please try again.

Enter the email address you signed up with

Email Address

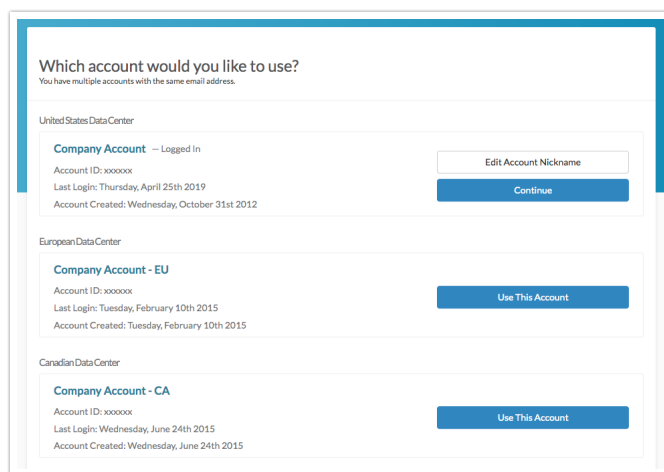

Never Mind Reset Password

You have multiple accounts with the same email

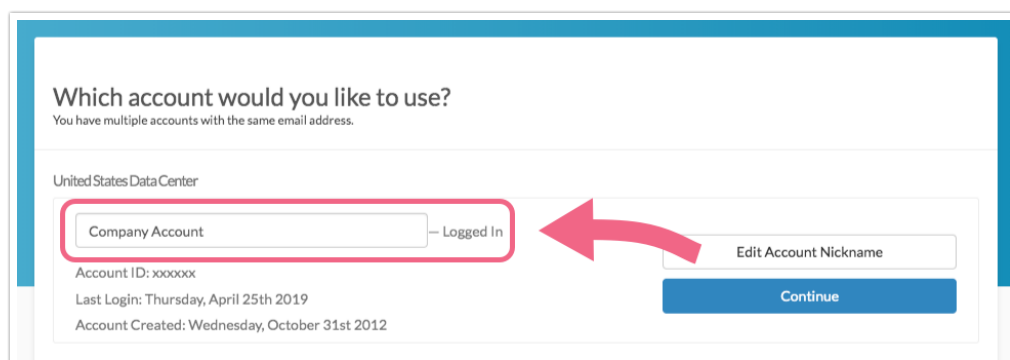

address

- Perhaps you signed up for a trial a while ago and are now a user on your company's account.
- Perhaps you are a consultant and have users with the same email address on multiple clients' accounts, or have multiple sub-accounts with the same email address.
- Perhaps you have accounts across multiple data centers (US, EU, CA) that share the same email address.

If you are using the same email on multiple accounts, our system will ask you which account (including which data center) you wish to log in to.

You will initially be logged in to one account. Click the **Continue** button to proceed with this account. You also have the option of updating the *Account Nickname* at this point. If you want to change the nickname, click the **Edit Account Nickname** button and customize the nickname in the provided field.

If you prefer to log in via one of the other available accounts, click the **Use This Account** button associated with that account. Input the password associated with that account and click **Access Account** to proceed.

Which account would you like to use?
You have multiple accounts with the same email address.

United States Data Center

Company Account — Logged In

Account ID: xxxxxx

European Data Center

Company Account - EU

Account ID: xxxxxx
Last Login: Tuesday, February 10th 2015
Account Created: Tuesday, February 10th 2015

Use This Account

Access Account

If you have multiple accounts with the same email address and request a password reset, you will receive one email for each data center where you have these accounts. For example, if you have accounts in the US and EU data centers that both use the email `jane.smith@company.net`, you will receive two password reset emails (one for US and one for EU).

Each email will have a separate reset password link for each account with that email address in a given data center. Click on the password reset link associated with the specific account which you wish to update.

Your user has been disabled

In multiple user accounts your Alchemer account administrator controls who has active logins. If you are an infrequent user or were away on leave, it might be the case that your administrator disabled your user so that someone else can take advantage of your user seat.

If you are having trouble logging in, you may want to contact your Alchemer [Account Administrator](#) and make sure that your login is still good. If you're not sure who that is, feel free to contact our [Support Team](#)!

Password Reset Considerations

- You can attempt to reset your password a *maximum of three times*, at which point you will be locked out of the system for *20 minutes* before you can attempt again.
- The password reset link that is emailed to you is valid until *Midnight (EST)* on the same day that the email was received.
