

Alchemer Release Notes: January 7th, 2021

Below is this week's log of fixes and improvements:

Improvements

[Performance] – Updated SMS statuses to be consistent between export and delivery statistics.

[Performance] – Grid questions/Custom tables aren't displayed when viewing individual responses when the individual response view is customized in any way. Grid questions and custom tables now display properly when viewing a customized individual response view.

Fixes

[Performance] – Section Navigator forwarding emails for EU and CA surveys misdirect to the US domain. Implemented fix for when sending a section of a survey via email. Built out the return link using the referred survey link instead of defaulting to the old domain.

[Performance] – Fixed an issue where copied page timers were linked to the original page upon editing.

[Performance] – Fixed a bug where the "Remember Me" (or "stay logged in") feature was broken when the user had multiple accounts associated with an email address.

[Performance] – Fixed an issue where reporting values may not be updated for existing survey responses when modified after collection.

[Performance] – Fixed an issue where survey pages could not be edited in the builder if a "Disqualify Respondent" URL redirect was present on the page.
